DETAILED ACTION

Response to Communication(s)

1. This Office Action is in response to the RCE filed on April 6th, 2009. Claims 1-12 are now canceled and new claims 13-27 are added. Claims 13-27 are now pending in the application. In view of the following new grounds of rejection, the previous final Office action has been withdrawn.

Allowable Subject Matter

2. Claims 13-27 are allowed. The following is a statement of reasons for the indication of allowable subject matter:

Many references in the art disclose the Internet protocol-based cellular telephone communications system. Most of those references are comprising a router, a foreign agent 'FA', a home agent 'HA', a base transceiver station 'BTS', and a handoff server 'HS', such as that found in Frid et al [U.S. 6,137,791], Olkkonen [WO 98/43456]. But none of the references of record alone or in combination disclose or suggest the combination of limitations specified in the independent claims including *"a router for routing voice calls and data on both an internet protocol network and a cellular telephone network, wherein the router converts the voice calls and data on the cellular telephone network into an internet protocol for transmission on the internet protocol network, and the router converts the voice calls and data on the internet protocol network into a cellular telephone protocol for transmission on the cellular telephone network; a base transceiver station, directly coupled to the router using the cellular telephone*

network, for communicating the voice calls and data with a mobile telephone using radio frequency signals within a transmission area associated with the base transceiver station and for transferring the voice calls and data between the mobile telephone and the router; and a home agent and a foreign agent, both directly coupled to the router via the internet protocol network, for forwarding the voice calls and data to the mobile telephone based on an internet protocol address for the mobile telephone, wherein the home agent registers a mobile telephone with the foreign agent, the home agent tunnels the voice calls and data for the mobile telephone to the foreign agent through the router, and the foreign agent delivers the tunneled voice calls and data to the mobile telephone via the router using the internet protocol address for the mobile telephone.” structurally and functionally interconnected with other limitations in a manner as recited in claims 14-27.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled “Comments on Statement of Reasons for Allowance.”
